

## TAM LIBRARY MANAGEMENT SYSTEM FEATURES DOC :-

Tam Library Management System is carefully developed for easy management of any type of library. It's actually a virtual version of a real library. It's a web based system where you can manage books of different categories, manage members of different types and manage issue/return of books easily.

Issuing a book to a member is just a matter of a click. There are configurations for day limit to keep a book, managing fine system and managing lost books.

TLMS will be an efficient and intelligent companion for managing your library.
