

Upload all the files & folder from Project Folder to your Server Directory.

Type your domain name/install (Example: <http://www.abc.com/install/>) from your browser

You just need to fill in your Database Host Name, Database Username, Database Password and Database Name

After fill up all the information, click Next to finish the installation.

After installation done,

Please create .htaccess file inside your Server Directory and paste the following code.

```
RewriteEngine On
```

```
RewriteCond %{REQUEST_FILENAME} !-f
```

```
RewriteCond %{REQUEST_FILENAME} !-d
```

```
RewriteRule ^(.*)$ index.php/$1 [L]
```

Final Step:

To change your website URL, open Application -> config Folder -> config.php

Please find `$config['base_url'] = 'http://.....'` .
