What we added in the new version ?

- Complete CMS. Create beautiful pages (Bootstrap template) and pick header image for each page you have.
- BLOG System
- FORM System. Create as many forms as you like, place them in any page you want. Contact form, tailor made, booking form, reviews, any form you can imagine. You create it. You use it. If you want keep it in your database, if you want get it sent to your email.
- FAQ System. Create many FAQs for your clients, travel agent. Place them in any page you want. Have full control.
- Support System. Any problem with your clients. Let them use support system to reach you. Dedicate team and make your clients happy.

- Maintenance Mode. We have created a maintenance mode for you to turn your website on and off with a click of a button
- File system. Now you can add files to your clients' page.
- Module System. Now you can add our free add ons to your system. You can update the module without updating the whole system. Lots of free add ons are coming. Visa Application, Day Tours, Transfers, ToDo Module, Tailor Made Add ons are all coming for free.
- Lots of improvements in the core system.
- Many more features for you to enjoy

So now you don't need Wordpress and lots of plugins to run a website for tour operators and travel agencies. Everything you need for your website. FRONTEND and BACKEND. You will have the full control. Custom made for tour operators and travel agencies.
